

WALLENSTEIN RANGHHO

TRACTOR
SKIDSTEER
THUMB ATTACHMENTS

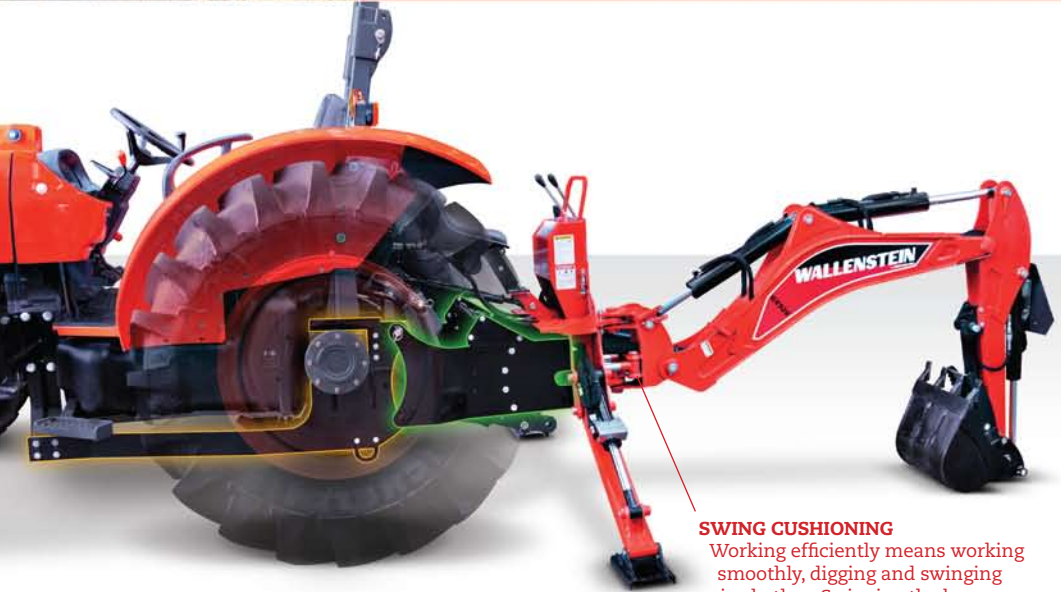

BREAK GROUND, NOT YOUR BACK

When it comes to landscaping and excavating, start the job right with the Wallenstein Ranchho, the backhoe attachment that digs deeper and reaches further.

GET TO THE BOTTOM OF THINGS

Designed for compact tractors, skidsteers and full-size tractors, the Ranchho gives you precision and power at your fingertips. The versatile curved-boom backhoe attachment that fits your tractor and your property. The Ranchho is a rugged backhoe that's ready to sink its teeth into any task you give it, from landscaping to concrete footings.

SUBFRAME MOUNTING

The two-part 4-point model specific subframe system absorbs the stress of heavy lifting. For a list of available applications visit www.embmfg.com.

SWING CUSHIONING

Working efficiently means working smoothly, digging and swinging in rhythm. Swinging the boom is controlled by cushioning hydraulic cylinders that reduce machine shake by slowing the boom as it reaches the furthest ends of the swing range.

Skidsteer tieback kit

SKIDSTEER MOUNT

The universal skidsteer mount connects easily to most skidsteers. The model-specific tieback kit ties the backhoe to the skidsteer, relieving stress on the bucket cylinders. Visit www.embmfg.com for a list of available tieback applications.

3-POINT HITCH

Turn your tractor into a backhoe with the simple 3-point hitch mount. The 3-point hitch also utilizes your tractor's draw bar for increased rigidity.

CURVED BOOM

The right geometry makes the job easier with the over-arching design of the new curved boom. Dig deep without impacting the edge of the excavation. This protects the backhoe from unnecessary damage and prevents ground from falling back into the hole.

HYDRAULIC POWER PACK

The optional self-contained PTO pump kit provides hydraulic power for tractors without available auxiliary power.

GREASABLE PINS ▲

PICK A COLOUR ▼

Red, Blue, Orange, Green, and Black.

WALLENSTEIN RANGHO GX BACKHOES

The Ranchho is the perfect attachment for your tractor that gets the most out of your land. Landscaping, excavating and trenching soon become easy tasks with the digging power and reaching length of the Ranchho. Add a thumb to the Ranchho and start moving rocks into perfect position for your landscaping projects. For smaller tractors without hydraulics, the optional power pack gets you digging.

WALLENSTEIN RANGHO

Ranchho GX620

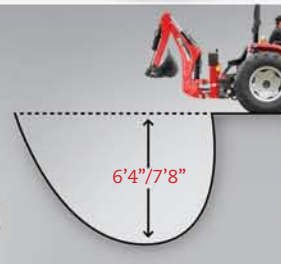

The **Ranchho GX620** is designed for subcompact tractors. With a digging depth of 6-feet and a 9-foot reach, the GX620 gets down and dirty, breaking the frostline and finishing the job quickly.

Ranchho GX720

For mid-size tractors between 35-70HP, the **Ranchho GX720** makes its mark. Digging down 7-feet deep and reaching 10-feet across, the GX720 breaks ground and keeps on going. With the excavator-style curved boom and easy to use controls, the GX720 is ready to handle any ground conditions from topsoil to clay and gravel.

CONTROLS - Take hold of the controls and start digging with the easy-to-use joystick-style levers. Dig deep and curl the bucket at the same time with the four-way controls that operate the boom, stick and bucket. Each stabilizer is lever-controlled as well.

DUAL CYLINDER BOOM PIVOT

All Ranchho models, including the GX620, use two hydraulic cylinders to control the boom swing. The dual cylinders provide strong, consistent movement throughout the entire 180-degree swing range.

WALLENSTEIN RANGHHO GX BACKHOES

WALLENSTEIN
RANGHHO

920

For contractors and landscapers that need to dig deep, but not in their pockets, the **Ranchho GX920** makes the grade. The large GX920 extends the usefulness of 60-90HP tractors with digging capabilities of 9-feet deep. Trenching for footings and excavating to spec becomes quick and easy without the added expense of a single-purpose excavator. The digging bucket is built using AR400-strength steel, ensuring rugged longevity.

The Ranchho can be mounted on a subframe, 3-point hitch or skidsteer. All are easy to disconnect and re-attach on the go without wasting time.

BUSHINGS

Hardened steel bushings are installed on all the main pivot points of the GX720 and GX920, including swing, boom, dipper and bucket. High quality bushings add life to the Ranchho by reducing the wear and tear as you dig and swing.

9'4"

The GX920 provides a 2-foot flat bottom at the maximum digging depth.

920XT

WALLENSTEIN
RANCHHO

EXTENDIBLE GX920XT BACKHOE

The Wallenstein Ranchho digs even deeper with the Extendible GX920XT model. Capable of hydraulically extending an extra 24" to dig 11' 4" deep, the extendible dipper stick gives you the extra reach when you need it. When contracted, the bucket and dipper stick curl up tight to the boom for easy travel and compact storage.

GX920XT
164"

11' 4"

The GX920XT extends an extra 24" and provides a 2-foot flat bottom at the maximum digging depth.

WITH THE
WALLENSTEIN
RANGHHO
WITH SKIDSTEER MOUNT.**

The Ranghho connects just like a bucket, and with added stabilizer bars for reduced shake. Just like the 3-point hitch models, the hydraulic controls hook into the skidsteer's external ports, making setup simple. The stabilizers widen the centre of gravity, making the narrow profile of skidsteers more sturdy when swinging the boom laterally. The thumb attachment is also available for both 3-point hitch and skidsteer mounted backhoes.

QUICK ATTACH BUCKET ADAPTER

From digging to ditching, Wallenstein's Quick Attach Bucket Adapter switches attachments quickly and easily with only one bolt and no hammering of pins.

The mechanical pin-grab coupler slides under the front pin and tightens around the rear pin, saving you time and hassle so you can get the job done. The Quick Attach Adapter is easy to install in the field on the GX720 and GX920.

DETACH

ATTACH

QC620

WALLENSTEIN
RANCHHO

SKIDDIGGER QC620 - When you need to get down to work, start digging with the Ranchho QC620. This skidsteer-mounted backhoe is a single-stick that reaches 6-feet deep and is controlled from inside the cab. The QC620 keeps you trenching without the need of continually repositioning.

THE HYDRAULICALLY TILTING BUCKET EASILY SCOOPS UP A FULL LOAD, MAKING QUICK WORK OF DIGGING.

THUMBS
Landscaping requires versatility & precision when positioning rockery. The Ranchho Thumbs give you the control to move heavy objects with delicacy, placing rocks in exactly the right place and with less scratching. Thumbs are also ideal for gathering awkward debris such as scrap wood and concrete chunks that don't easily fit into a bucket. Wallenstein provides 2 types of thumbs for the Ranchho, hydraulic and mechanical.

The Hydraulic Thumb is the most flexible way to grab hold of different sized objects and place them where you want them. The hydraulic thumb also allows you to tilt the load as you position it for perfect placement. When the thumb is not needed, it neatly tucks against the stick. (Available on 720/920 only, n/a on 920XT)

The Mechanical Thumb attaches to the stick and has 5 different positions you set using a pin. Using the mechanical thumb allows you to better control material that is difficult to scoop or place with precision. (Available on all models except 920XT)
