CHOOSE YOUR SIZE TONUTTI DISC MOWER QUALITY BUILT FOR QUALITY YEAR AFTER YEAR

TONUTTI DISC MOWERS are designed to help the farmer in producing crops high in quality and value.

TONUTTI DISC MOWERS offer high speed operation, wear resistant material, non-clogging cutterbars and high quality steel knives for a uniform and even cut. The cutterbar design ensures durability and greater resistance to bending stress. The cutterbar oval discs are shaped with special contoured edging to ensure great sturdiness even under tough working conditions such as on stony terrain.

TONUTTI DISC MOWERS are designed for all types of crops and for use in a wide range of conditions. The hinged attachment along with the suspension system allows for easy adaptability to all terrain contours always maintaining the cutterbar at the proper height and ground pressure.

...E, THEN CHOOSE DISC MOWERS ...QUALITY PERFORMANCE, ...ER YEAR

DMP 165, 210 is the version for small and medium farms. All of the DMP disc mowers have free wheel drive lines, top covers, safety break-away mechanism, hydraulic lift and 2 deflector cones mounted on the outer and inner disc. The cones reduce the swath width and provide for wheel space to start the following cut.

DMP 245, 285, 320 is the heavy duty version for larger and commercial operators. No detail has been overlooked in selecting quality materials and manufacturing procedures to produce these machines. Our target is to provide reliable machines with good performance, ease of operation and safety both during use and transport. Another plus is our force feed lubrication gearbox for longer life and minimum maintenance. Standard equipment includes adjustable swath conveyors, folding front guards and transport latch.
