“EASY RAKE”

EASY TO ASSEMBLE, EASY TO USE, EASY ON YOUR TIME

HAY LINE MACHINES

Central kicker wheel

Transport position

Single side rake configuration

Easy windrow width adjustment

ALL TECHNICAL DATA IS INDICATIVE AND NOT BINDING - PRINTED 2007

The "Easy Rake" has been designed with a series of innovations that are unique on the market, which allow the operator to save time both regarding assembly of the machine and during work phases. The very strong structure and the arms of the spring-loaded independent raking wheels allow to work at one's best in the most difficult conditions.

The opening and closing system of the independent sections also allow to work just on one side. The central raking wheels (optional) pass from the transport position to the work position automatically by means of a hydraulic system.

Adjustment of the swath takes place through a system of easy-to-use bushes.
