

SOME PEOPLE THROW A FIT WHEN IT SNOWS

~ You throw the snow. ~

Grasshopper FrontMount™ power units serve as the heart of a complete, high-performance snow removal system that is so efficient you can clear sidewalks and driveways with no wasted motion. True ZeroTurn™ maneuverability allows you to effortlessly go in and out of places you once thought only walk-behinds could go.

With Grasshopper snow removal implements there is only one engine to maintain, saving you time and money. Plus, Grasshopper implements cost less to purchase than single-purpose, stand-alone equipment.

These compact, heavy-duty implements power through snow with professional-grade construction designed to endure season after season of throwing, sweeping and plowing.

Multipurpose dozer blades and V-plows are highly efficient at moving dirt, gravel and snow*. Traction is enhanced by operator sitting position directly above the drive wheels.

1 A full-view enclosure provides the operator with protection from winter wind and snow for comfort and productivity. Options include electric windshield wiper and a 16,000 BTU heater for liquid-cooled power units. Requires counterweight. Note: Winter enclosure is not for mowing or turf-care applications.

PTO-driven rotary brooms sweep dirt and debris, and clean up to eight inches of snow.*

2 PTO-driven Traction-Plus™ snowthrowers are equipped with 180° rotating discharge spout to propel snow* up to 30 feet away.

*Tire chains and spacer kits available for turf tires.
