

THE UNI-HITCH

Kasco's Uni-Hitch System adds versatility to your Front End Loader. Designed to fit most Compact Front Loaders, the Uni-Hitch allows the use of Universal Hitch (Skid Steer Style) Attachments.

The Uni-Hitch for Loaders is a 2-Part System:

1. The Hitch Adapter pins onto your loader for use of skid steer attachments.
2. For use of Standard (non-Skid Steer) Attachments, adapter plates may be added to the attachment.
